THE ARCHITECT COLLECTION

Ten concepts for outdoor training

BY SPARTA / EUROTEC GROUP

LINEA / Illustrative design concept

A place to train. Made to belong.

Ten concepts that connect training, materials and the character of a place. Each is a starting point for a personal design.

PORTAL

Ivory / Champagne

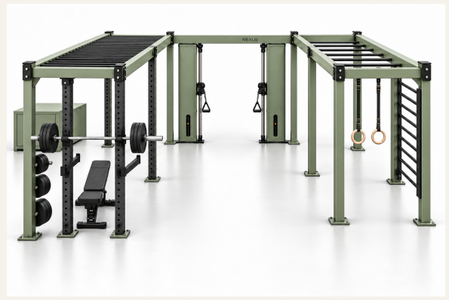

LINEA

Graphite / Oak tone

VELA

Terracotta / Warm stone

ATRIUM

Sage / Graphite

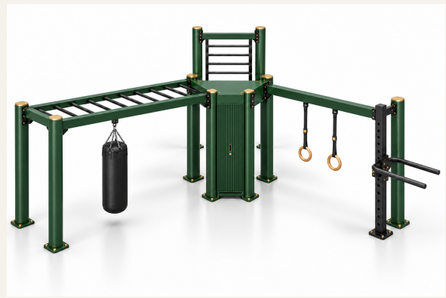

DUET

Navy / Stone

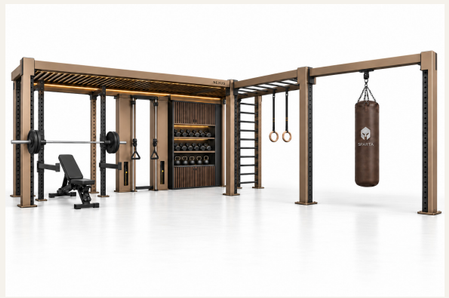

ARCUS

Bronze / Champagne

TRIAD

Forest / Brass tone

RESERVE

Champagne / Espresso

NICHE

Ivory / Oak tone / Taupe

AERO

Graphite / Oak tone

PORTAL

THE SOFT FRAME

Training becomes part of your home.

Soft ivory and champagne frames define two open training zones. Dual cable towers, a flat bench, wooden rings and a ladder form a quiet architectural composition.

Ivory / Champagne

Dual cable / Bench / Rings / Ladder

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

LINEA

THE TRAINING LINE

One line. Three training worlds.

A linear layout connects a bar-and-bench zone, a punching bag and cable training with storage. A graphite frame and oak-tone details create one clear architectural line.

Graphite / Oak tone

Bar and bench / Punching bag / Cable and storage

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

VELA

THE GARDEN STUDIO

Your private studio moves outdoors.

Terracotta columns, slats and warm lighting create a personal training pavilion. Dual cable towers, a flat bench and a ladder sit alongside accessory storage.

Terracotta / Warm stone

Dual cable / Bench / Ladder / Storage

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

ATRIUM

THE OPEN COURTYARD

An open courtyard. Training around you.

Three wings surround an open centre, connecting strength and movement zones. Sage and graphite, cable towers, rings and a ladder bring order and openness to the space.

Sage / Graphite

Bar and bench / Dual cable / Rings / Ladder

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

DUET

THE CONNECTED PAIR

Strength and movement in connected wings.

Two volumes are joined by a training bridge with an open ring zone between them. Navy, stone and brass-tone details frame strength, cable and storage areas.

Navy / Stone

Bar and bench / Rings / Dual cable / Ladder

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

ARCUS

THE SCULPTURAL SIGNATURE

An architectural arch. Personal training.

Sculptural arches wrap a dark inner training frame beneath a rhythm of roof slats. Dual cable towers, a bench, rings and a ladder become part of the design language.

Bronze / Champagne

Dual cable / Bench / Rings / Ladder

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

TRIAD

THE MOVEMENT HUB

Three arms. Freedom to move.

A central storage core connects three training arms. Rings, dip bars, a ladder and a punching bag each have their own place in a forest-green and brass-tone composition.

Forest / Brass tone

Rings / Dip bars / Ladder / Punching bag

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

RESERVE

THE PRIVATE CLUB

Your private outdoor club.

A shaded wing meets an open movement zone in champagne and espresso tones. Strength training, a cable-and-storage wall, rings and a punching bag create a private-club concept.

Champagne / Espresso

Bar and bench / Cable and storage / Rings / Bag

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

NICHE

THE COMPACT TRAINING WALL

Personal training, alongside architecture.

A compact concept places training alongside an architectural wall, with an open front approach and a separate place for accessories. Dual cables, a pull-up bar, an adjustable bench and storage combine in ivory and oak tones.

Ivory / Oak tone / Taupe

Dual cable / Pull-up bar / Adjustable bench / Storage

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

AERO

THE ROOF TERRACE CORNER

A training corner. An open outlook.

A two-bay bodyweight training concept with an overhead ladder, wooden rings and a dip station, beside an open route across a private roof terrace. Graphite and oak tones keep the composition restrained.

Graphite / Oak tone

Bodyweight / Overhead ladder / Rings / Dip station

Loads, anchoring and ladder-rung width require project-specific professional review.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

PORTAL

Quiet architecture in a Mediterranean courtyard.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

VELA

A training pavilion beside the pool courtyard.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

ARCUS

Sculptural arches and warm materials in the garden.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

RESERVE

A private setting for strength and movement.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

NICHE

Personal training alongside the architectural wall.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

AERO

Bodyweight training on an open terrace.

Illustrative design concept. Final specifications and feasibility are defined through detailed planning.

From an idea to your own space.

01

The place

Define the setting, access, circulation and training style.

02

The concept

Choose the architectural language, training mix, materials and finishes.

03

The design

Coordinate the layout, site infrastructure and connections, then develop the specification for approval.

The images illustrate design concepts. Layout, equipment, finishes and site suitability are defined through detailed planning and client approval.

Let's plan your version.
