

VISION VST600 SERIES

EXTREME DURABILITY. SPACE-SAVING VERSATILITY.

Complete your fitness offering by adding essential strength training equipment. Our uncomplicated designs are easy for anyone to use, while our streamlined aesthetic brings a touch of modern style to your facility.

When it comes to a strength training solution that's as versatile as it is durable, our VST600 single and dual stations can help all the different people you serve strengthen their whole body while standing up to the toughest environments. More importantly, heavy-duty construction and robust design details mean that it will be there for your people when they come back for more, day after day for years. Independent converging and diverging motions on select units provide a natural resistance movement that feels smooth and natural.

Choose from seven dual-station units, and complete your offering with more seven VST600 single-station units. The versatility of our dual stations makes it easy to create a weight-training collection just right for your space, your budget and the people you serve. By mixing and matching a range of our two-in one stations, you can make the most of your floor space while providing a complete strength training experience. Count on the VST600 series for a mix of advanced biomechanics and just right for your space, members and budget that will bring your vision of fitness to life.
